

ANALISA SAHAM INDONESIA

September 14, 2020

- * **The JCI trading range: 4,975pt - 5,075pt (Friday close: 5,017pt)**
- * **Wall Street closed higher on tech shares rebound**
- * **The JCI is expected to fluctuate but incline higher by support of bargain hunters**

Morning,

The Jakarta Composite Index (JCI) today (14/9) is expected to be within the range of 4,975pt – 5,075pt, to fluctuate but incline higher, cautiously factoring in this week's positive news. Meanwhile, Friday last week (11/9) the DJIA ended higher by 131 points or 0.5% to 27,666pt, while S&P500 and the Nasdaq higher and lower by 0.1% and 0.6%, respectively.

The JCI facing the uncertainty of PSBB

The foreign outflow which were linked to the re-tightening of the Jakarta capital city large-scale social distancing (PSBB) measure, starting today September 14, is expected to diminish, in our note, for the following points

1. Indonesia trade position during January – July 2020 of total surplus of USD8.7bn vs. deficit of USD2.2bn in the same period last year is a fundamental sweetener to attract foreign re-inflow this week within the data release time tomorrow (**15/9**).
2. Should Bank Indonesia hold the reference BI7D-RRR this week (**17/9**), yield differential with other countries such as the United States, Japan, UK, and EU, is expected to remain attractive to induce reflowing of foreign funds to the stock market.

3. The following news in the media during the weekend, has not been factored in to the stock market, we view. Current PSBB allows 25% - 50% capacity for public services and private corporation to operate, to include public and on-line transportation, traditional markets and malls, unlike the previous one.

At the other end, Friday last week the WTI price closed flat at USD37.3/barrel as compared to the previous one. Meanwhile the USIDR closed at IDR14.979 vs. IDR14.871 the previous one.

We advise the following recommendations, for both trading and longer-time investment purpose. **AALI, LSIP (sector of Agri, allocation suggestion Underweight), UNTR, ITMG, ADRO, PTBA (sector of Coal Mining, allocation suggestion Market-weight), GGRM, UNVR, ICBP (sector of Consumer, allocation suggestion Overweight), ASII (sector of Automative, allocation suggestion Market-weight), and ACES, SCMA, MAPI (sector of Trade, allocation suggestion Overweight),and TKIM (sector of Basic Industry, allocation suggestion Market-weight).**

Cheers,
